

SilverBridge

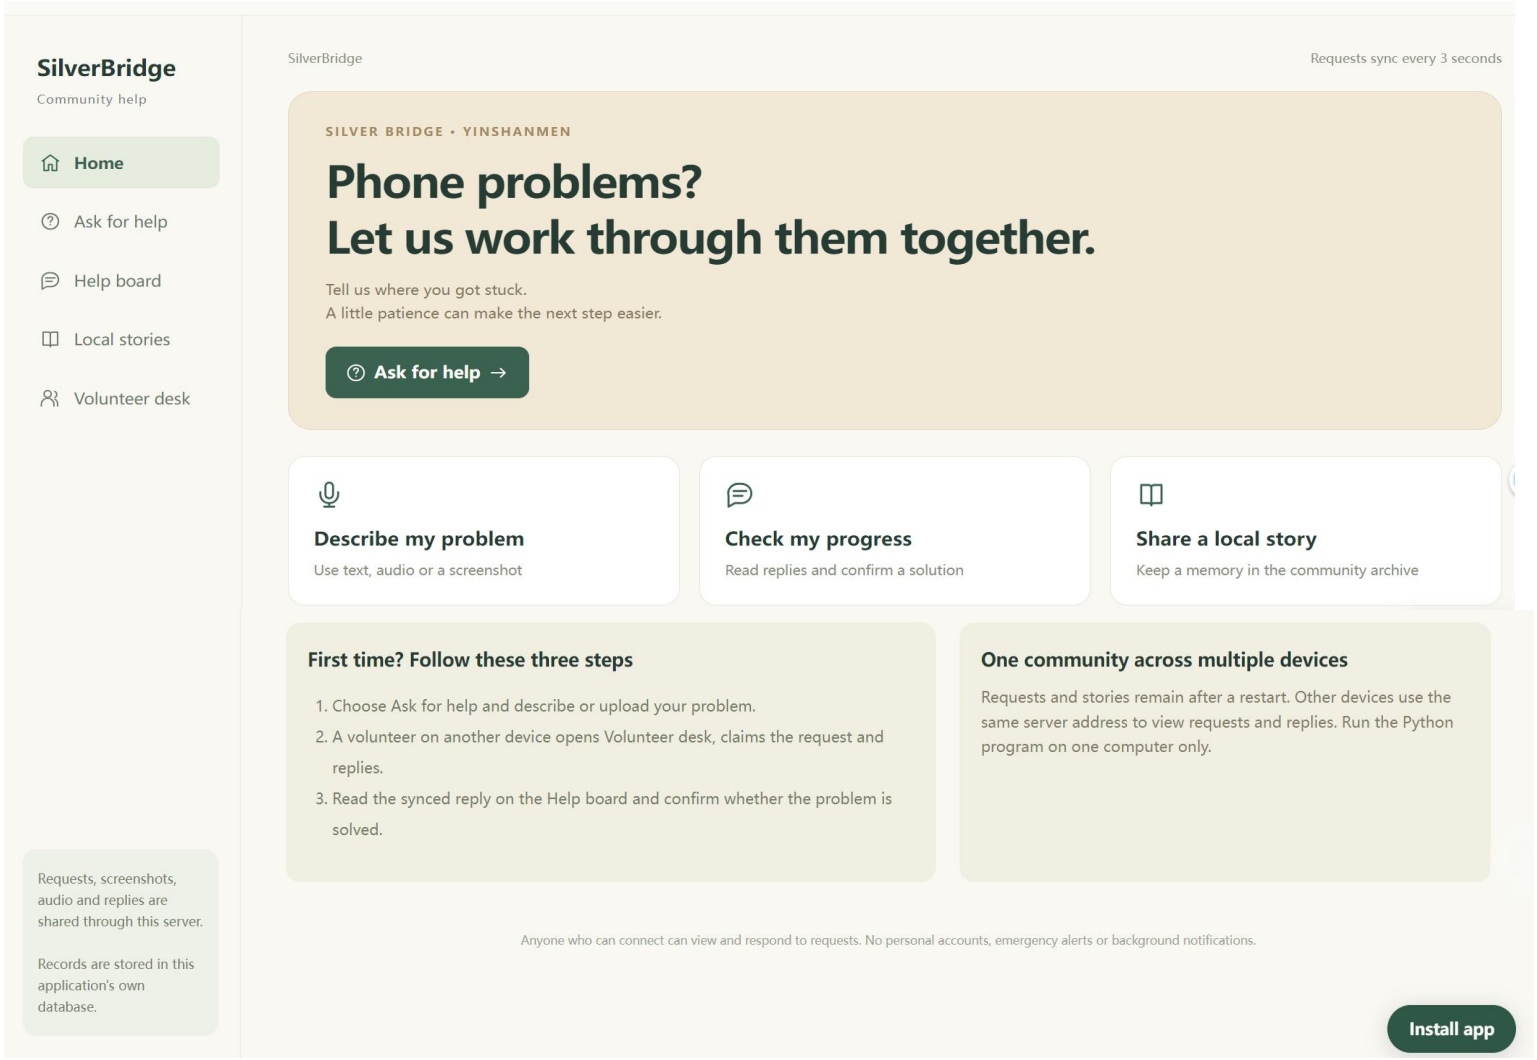

SilverBridge: A Python-Based Community Help and Volunteer Coordination App

Tang Ziyi

SilverBridge System Architecture Overview

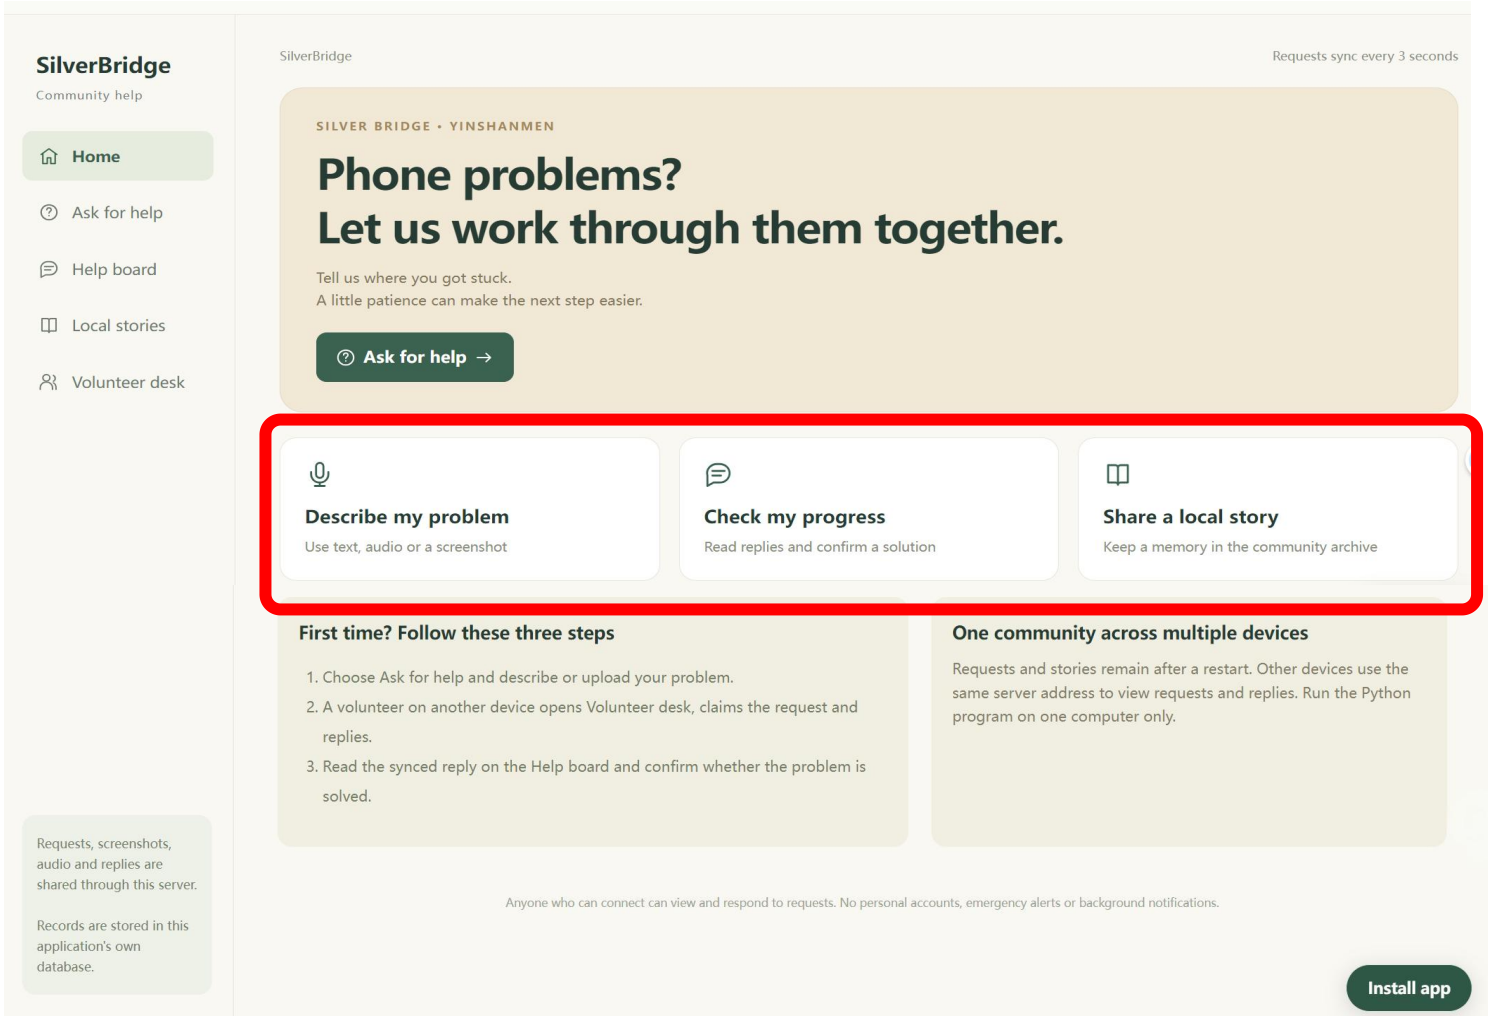

Home Page Community Help Landing

- Intuitive home layout featuring a three-step workflow and multi-device syncing for easy access.

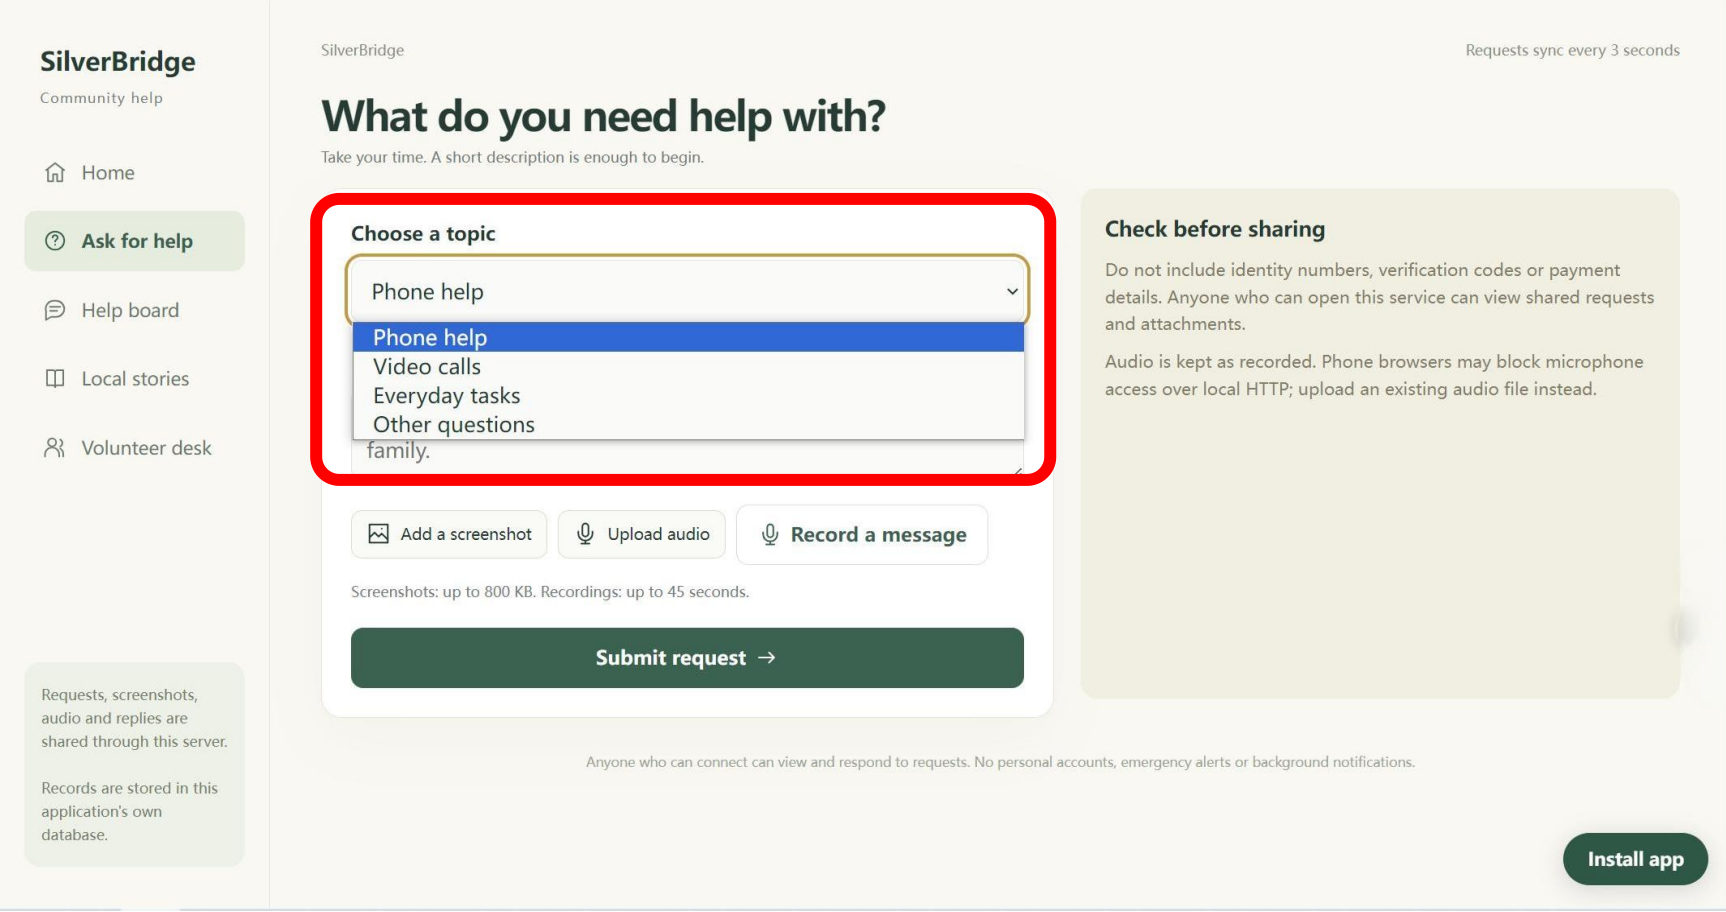

Home Page Three Step Help Workflow

- Red box highlights the core interaction loop: describing issues, checking progress, and sharing storie.

Community Help Request Form

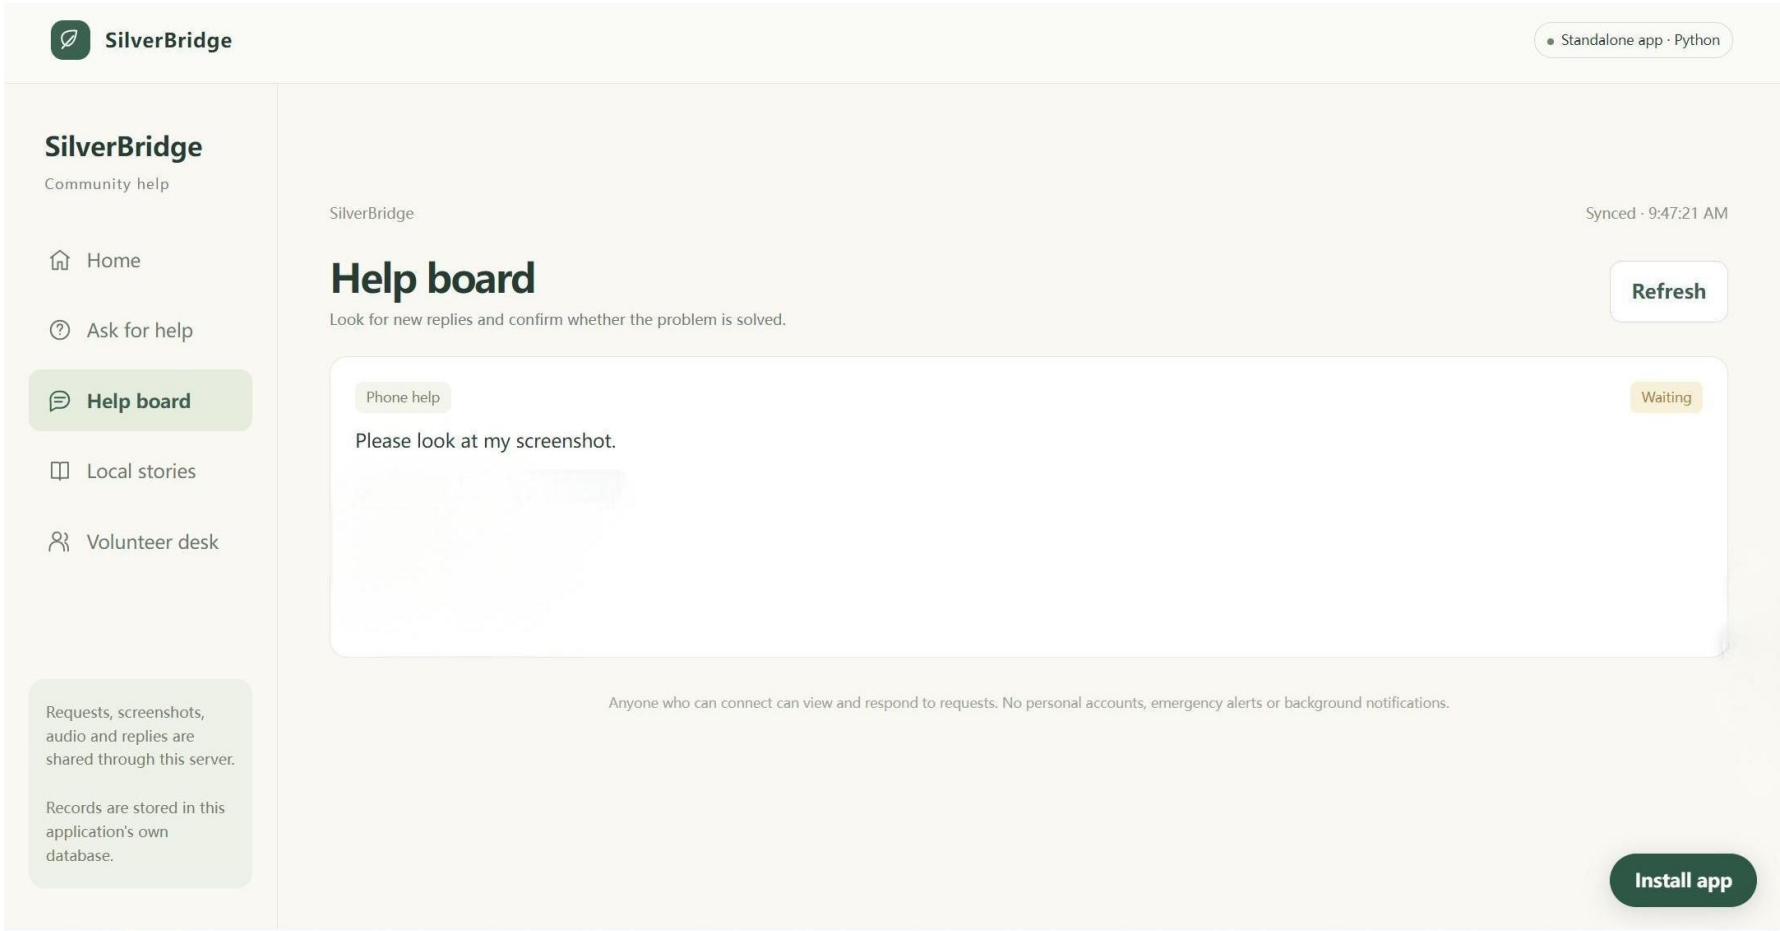

SilverBridge

- User-friendly form.

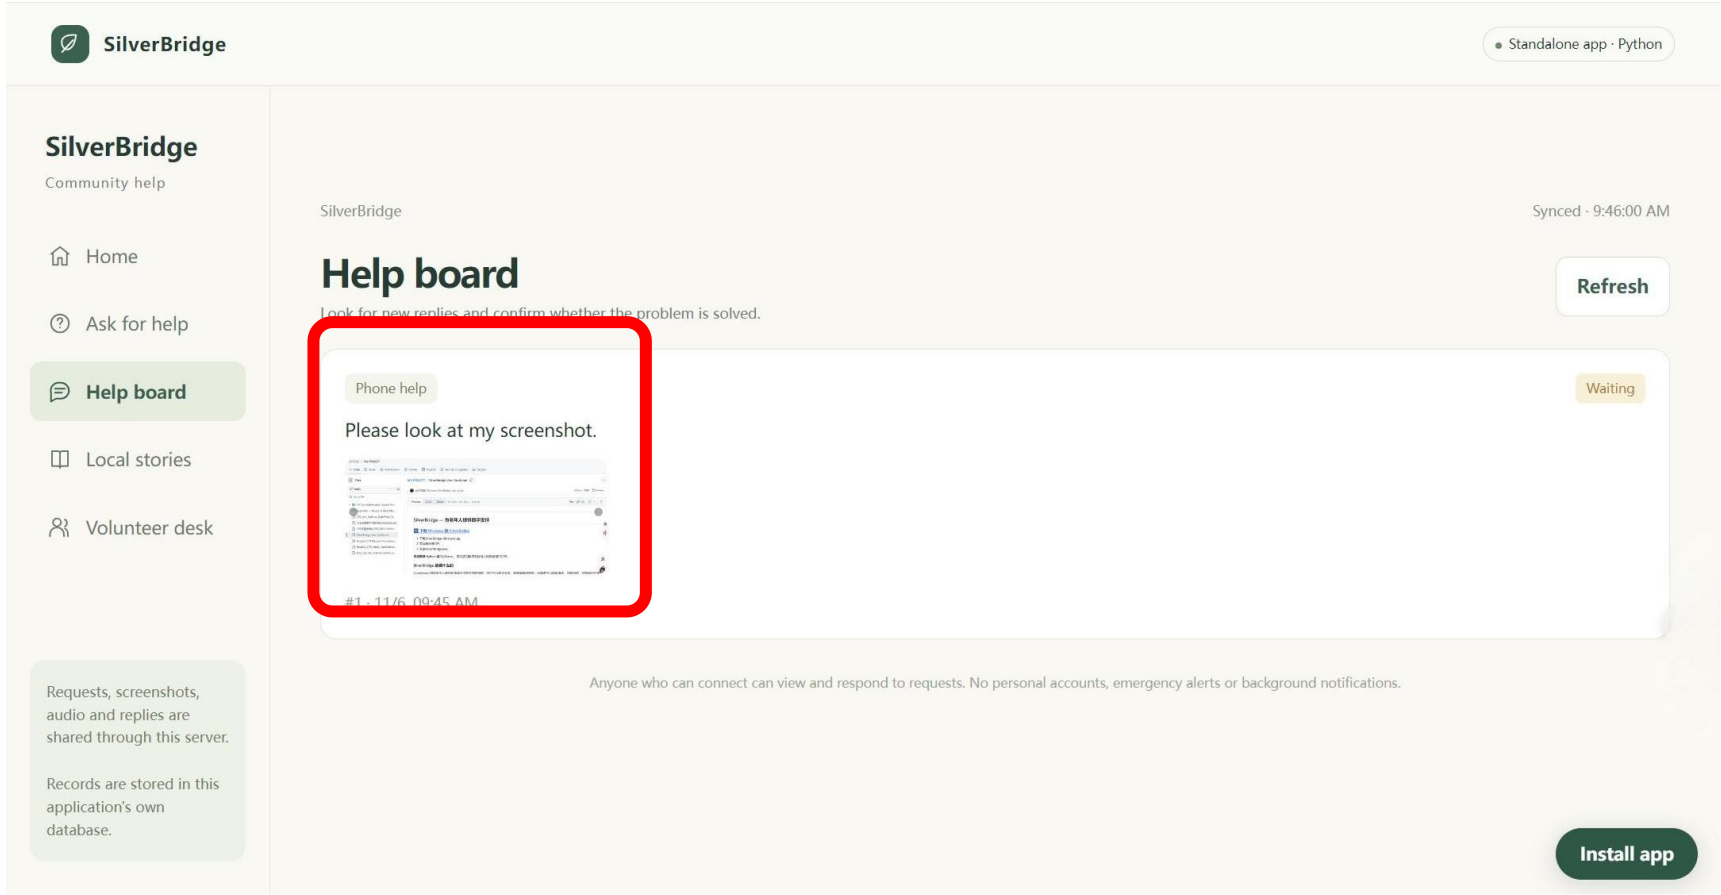

Red box highlights the topic dropdown, supported by text, screenshot, and audio attachments.

Community Help Board Main Interface

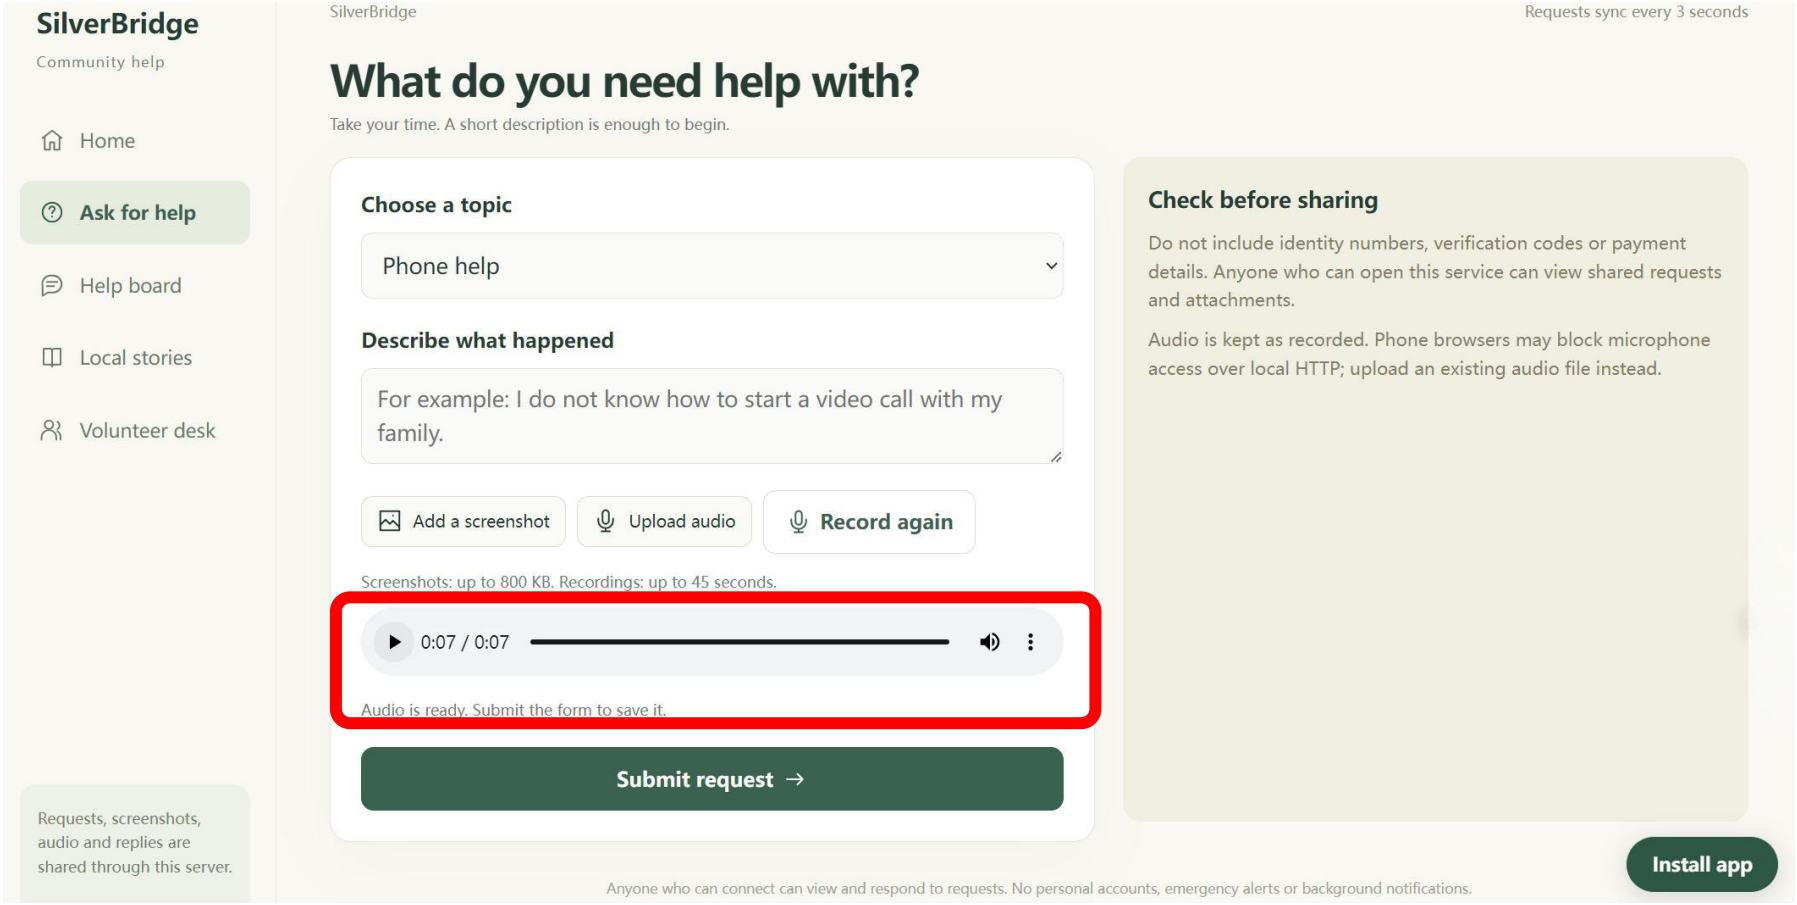

- Central dashboard displaying active requests with status tags (e.g., Waiting) and real-time server syncing.

Published Screenshot-Based Help Request Detail

- Tracking a published request. Red box highlights the screenshot attachment, helping seniors explain issues visually.

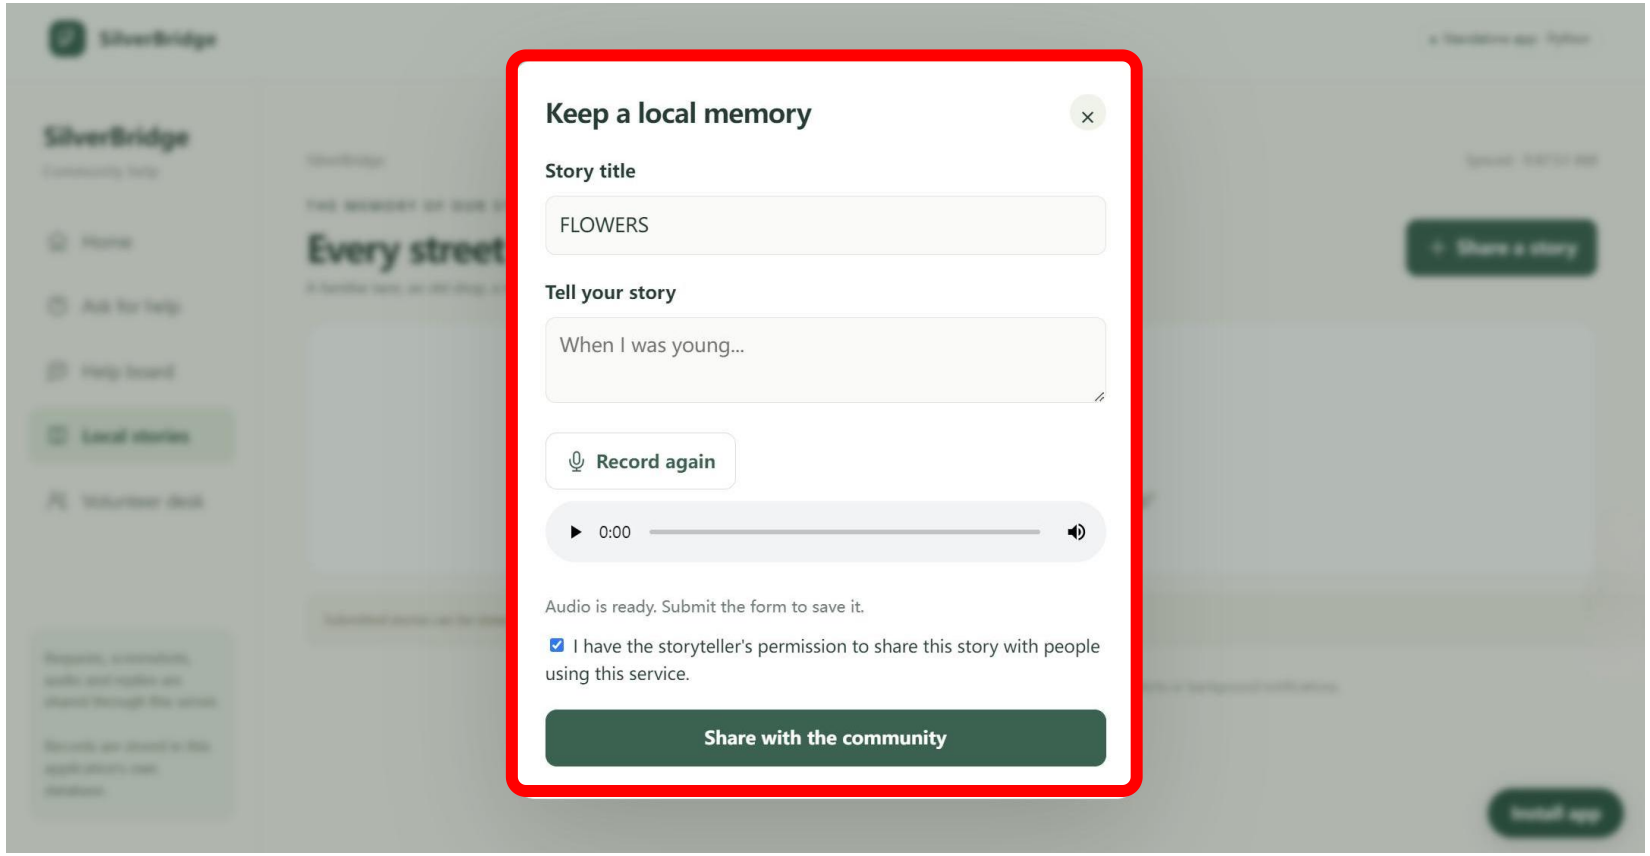

Audio-Based Help Request Submission Form

- Audio-integrated form. Red box highlights the audio player, allowing seniors to record voice messages (up to 45s).

Local Story Sharing Dialog

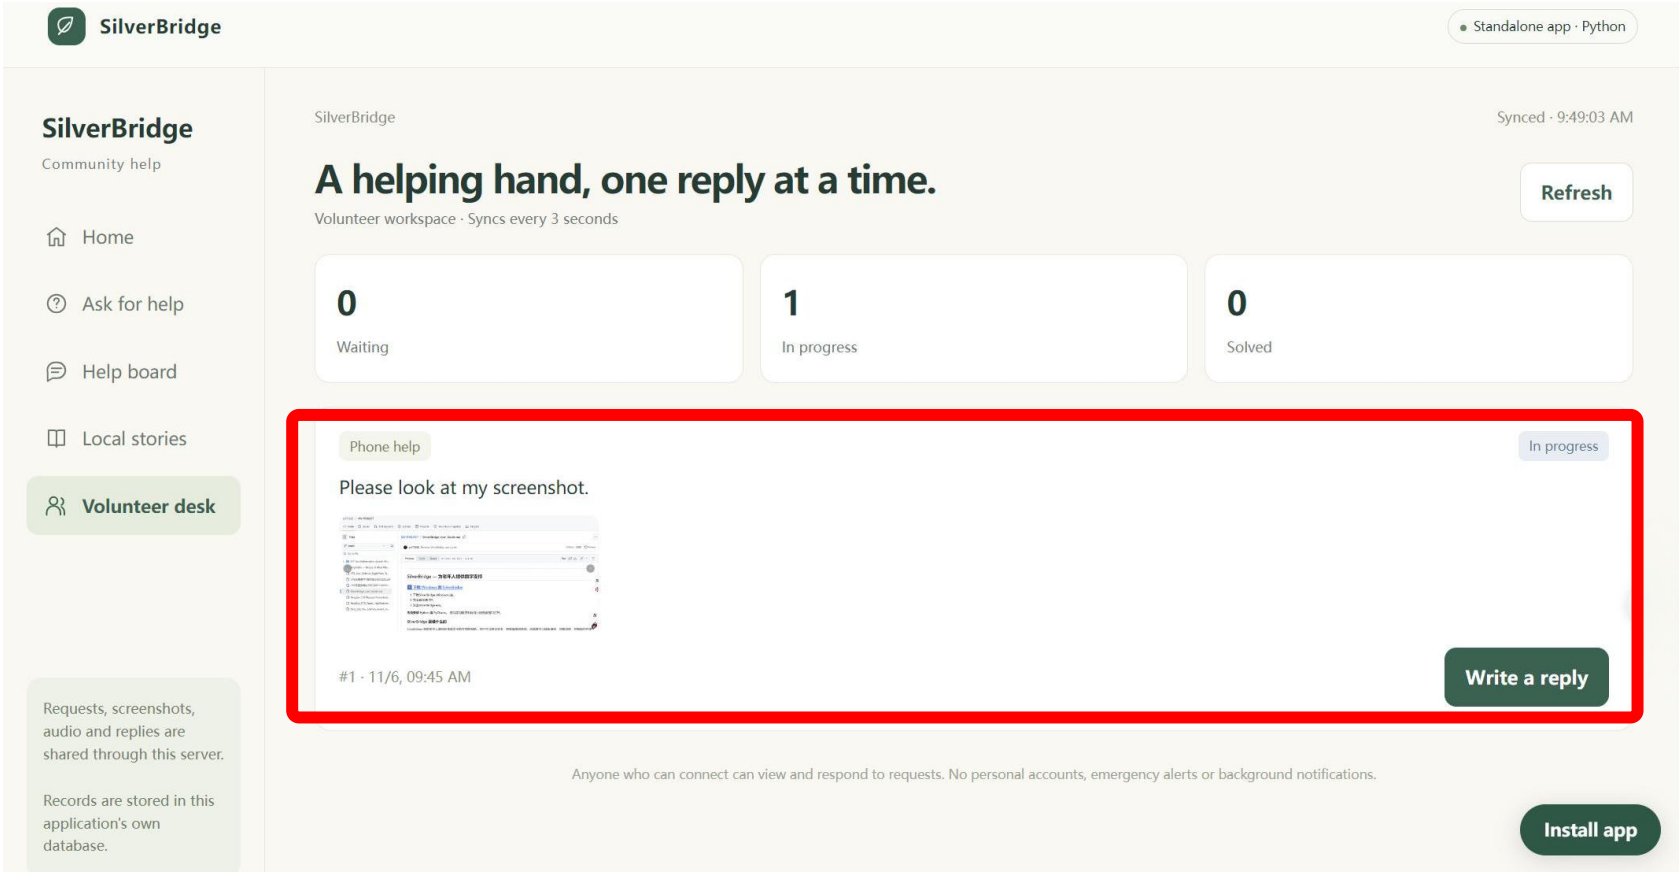

SilverBridge

- Memory-sharing modal. Red box highlights the secure form for users to record and share personal storie.

Volunteer Workspace Dashboard

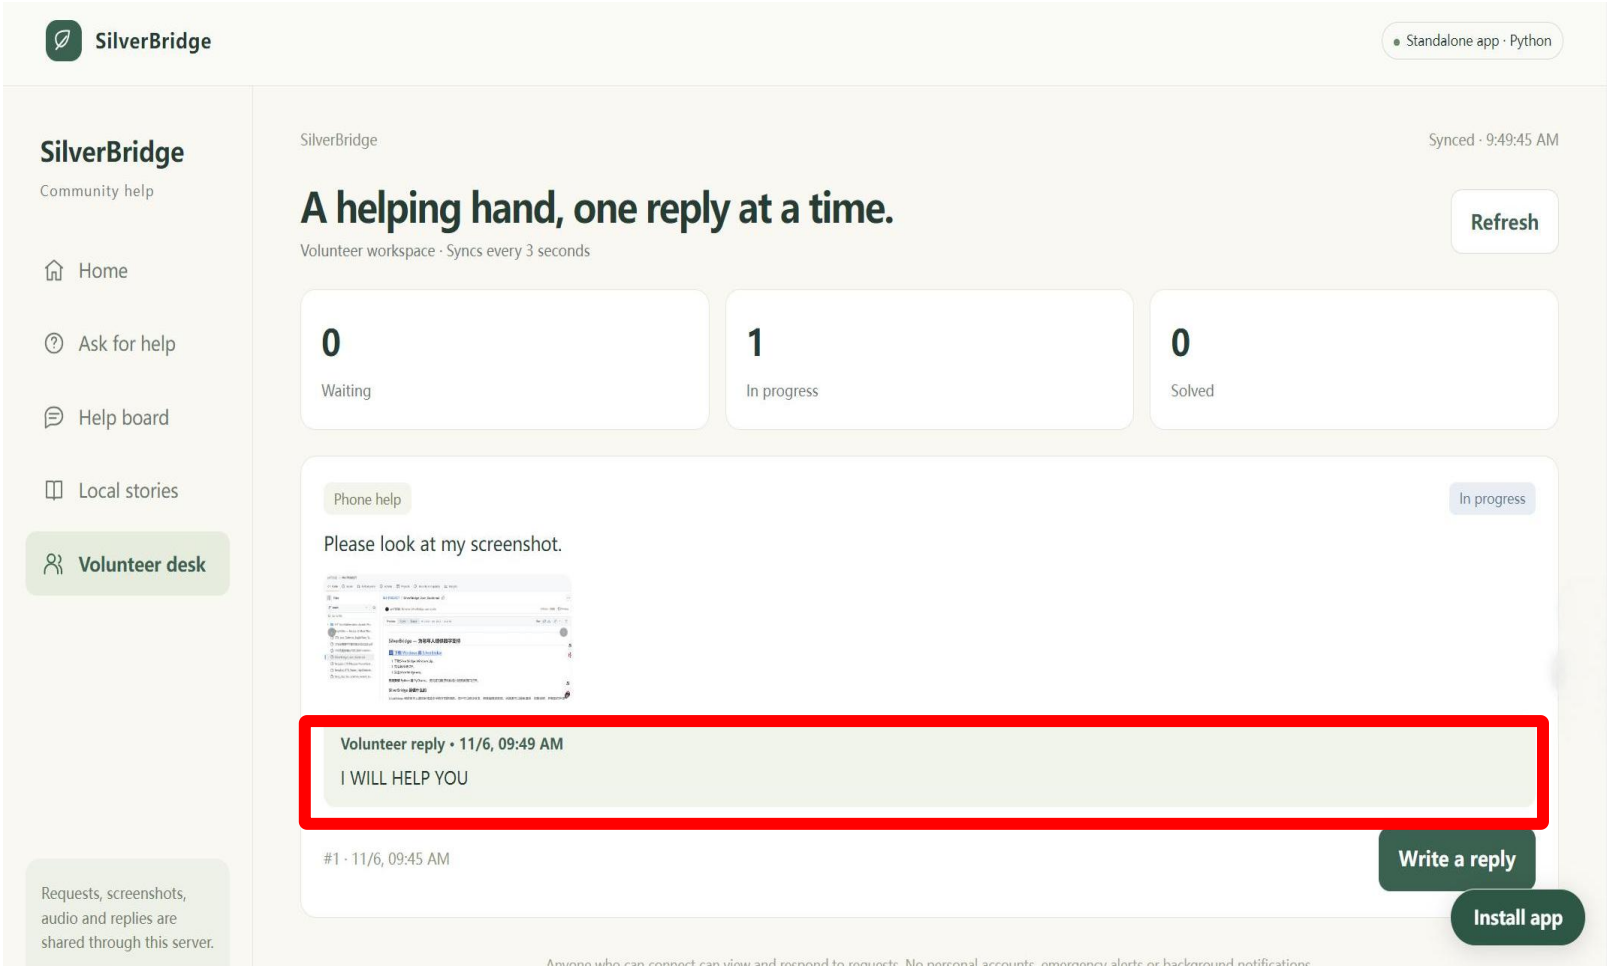

SilverBridge

- Volunteer dashboard.

Red box highlights an active request and the "Write a reply" button for seamless assistance.

Volunteer Workspace with Reply Message

- Reply interaction view.

Red box highlights the volunteer's response, demonstrating the complete community help loop.
